The mission of the Army Medical Department Center & School (AMEDDC&S), located at Fort Sam Houston, TX, is to envision, design, train, educate and inspire a premier military medical force for decisive action in support of our Nation. The AMEDDC&S vision is to be the foundation on which the AMEDD is built, sustained and transformed. Our strategies for accomplishing this vision include excellence in products and services, realizing employee potential, embracing change management and operational excellence.

In addition to its schoolhouse role, the AMEDDC&S has highly varied functions in doctrine development and applied research. Through ongoing and extensive research, we determine medical requirements throughout the combat mission, from the battlefield to the medical treatment facilities, as well as test their capabilities, safety, and long-term viability. We enhance virtual military healthcare environments in order to improve casualty reporting capabilities, enable the sharing of invaluable lessons learned and subject matter expertise, and prepare our healthcare graduates to care for Soldiers of the future and their families. Our distributed learning programs and expansive textbook publications deliver training and education wherever and whenever it is needed.

By striving to expand levels of responsibility and capability for our leaders in training and place them in the most realistic and challenging environments possible, we prepare them to make the critical decisions that will determine the outcome of their missions. Through state-of-the-art, hands-on, scenario-based training driven on lessons learned from today's battlefields and clinical environments, we create an environment in which students can develop the educational and training capabilities they will need in order to provide

the best casualty and patient care possible. AMEDDC&S multi-service training includes prehospital medicine, preventive health services, medical science, veterinary science, health services administration, leadership, clinical support services, nursing science, dental science, combat medic training, and pastoral ministry training. We offer five master's degrees and nine doctoral degrees, with four degree programs highly ranked by US News & World Report. Through our affiliation with top ranked universities, students can earn master's degrees in health administration or combined health and business administration, nutrition, physician assistant studies, and social work; or entry level doctoral degrees in physical therapy, occupational therapy, pastoral care, and anesthesia nursing; or advanced clinical doctoral degrees in physician assistant in emergency medicine, general surgery or clinical orthopedics, sports medicine-physical therapy, and orthopedic and manual physical therapy.

The AMEDDC&S also has the responsibility of determining what personnel the AMEDD needs and designing career patterns to support it. Our dedication to AMEDDC&S professional staff development and career life-cycle management assures us that our students will continue to receive the benefits of the best education and training opportunities available from some of the world's most capable and innovative instructors, training developers, and staff members.

Historical Perspective

**1920** The Medical Field Service School was activated at Carlisle Barracks, Pennsylvania, on September 1, 1920. The establishment of the school was prompted by a request from the Surgeon General based on the lessons learned in preparing officers of the Medical Department to serve in World War One. War Department Circular 419, dated December 23, 1920, officially designated the new school as the Medical Department Field Service School, which took the motto “To Conserve Fighting Strength.”

**1921** The Medical Field Service School was organized into five teaching departments, and the first course of instruction started on June 1, 1921, with a total of fifty medical and twenty dental officers. The mission of the school also included the training of National Guard, Reserve and Non-Commissioned Officers.

**1924** The first professional course for Non-commissioned Officers was conducted, and certificates were awarded to 32 Noncommissioned Officers and 14 Privates First Class.

**1946** On February 15, 1946, the School was discontinued at Carlisle Barracks, Pennsylvania, and moved to Fort Sam Houston, Texas.

**1947** On January 15, 1947, the Army Medical Department schools were consolidated with the Medical Department Enlisted Technicians School and re-designated the “Medical Field Service School.”

**1972** The Army Medical Department was reorganized in 1972, and the Medical Field Service School was re-designated the Academy of Health Sciences.

**1975** In 1975, the Academy of Health Sciences was assigned as a major subordinate unit of the U.S. Army Health Services Command.

**1984** In 1984, the Department of Aeromedical Education and Training was re-designated as the Army School of Aviation Medicine and assigned to the Academy of Health Sciences.

**1987** In 1987, the 1st and 2d Battalions of the Center Brigade were renamed the 187th and 232d Medical Battalions, respectively. The 3d Battalion was re-designated in 1989 as the Academy Battalion.

**1991** Due to the reorganization and expansion of its mission, the Academy of Health Sciences was re-designated in 1991 as the U.S. Army Medical Department Center & School.

**1995** In 1995, the U.S. Army Garrison, Fort Sam Houston, Texas, was transferred from the U.S. Army Forces Command to the U.S. Army Medical Command and further assigned for command and control to the U.S. Army Medical Department Center & School.

**2001** In 2001, U.S. Army Trauma Training Center is established as part of the Center and School in Miami, Florida providing hands-on training with the management of severely injured patients.

**2005** In 2005, Defense Base Realignment and Closure Commission (BRAC) “...co-locates all (except Aerospace Medicine) medical basic and specialty enlisted training at Fort Sam Houston, TX with the potential of transitioning to a joint training effort...”

**2010** In 2010, selected AMEDD Center and School students and staff transition to the Medical Education and Training Campus in accordance with BRAC, where 41 of the 315 AMEDD Center and School programs of instruction are taught.

## Medical Educational Training Campus (METC) AMEDD Center and School (AMEDDC&S)

**Excellence in Action!**

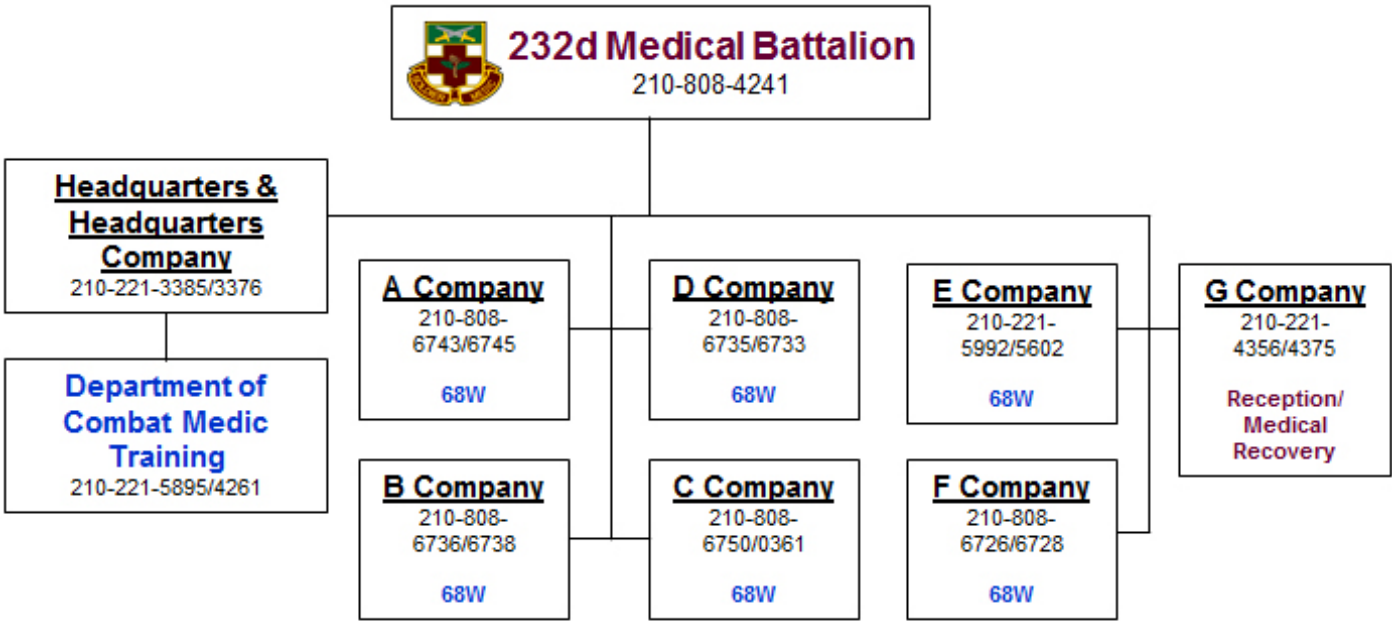

**Train to Save!**

32d Medical Brigade

232d Medical Battalion

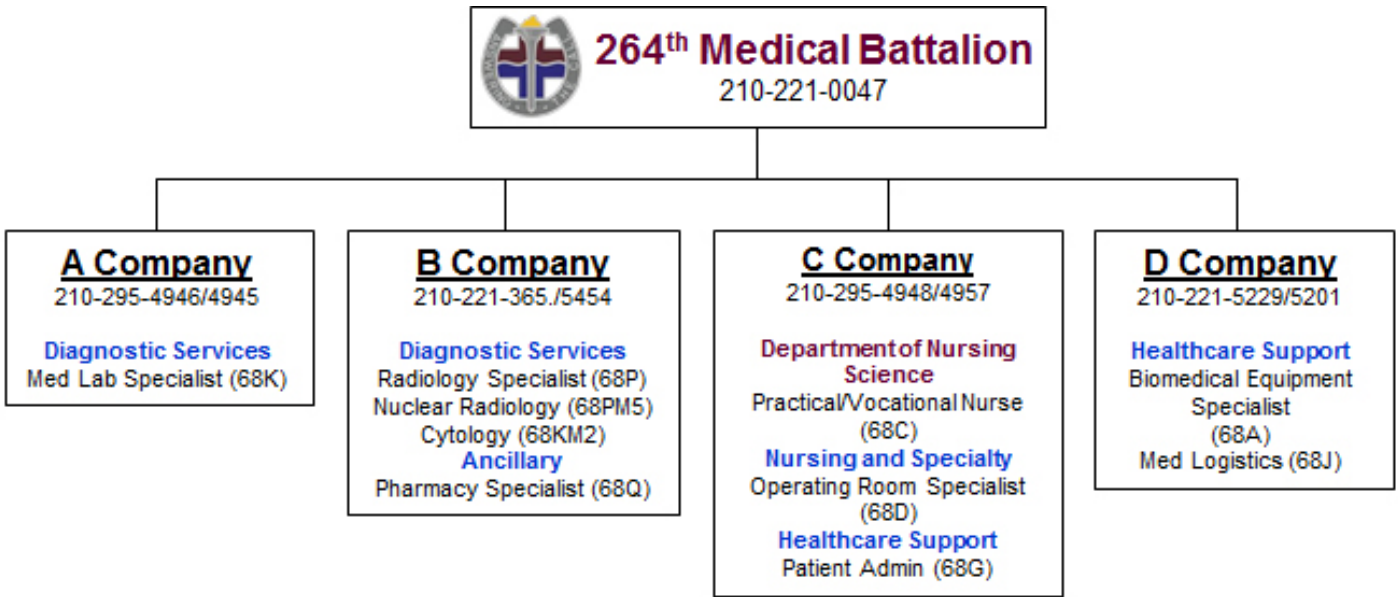

Produce values based Soldier Medics who are proficiently skilled, trustworthy, disciplined, physically fit and mentally sound.

Medical Education & Training Campus (METC)  
AMEDD Center and School (AMEDDC&S)

264th Medical Battalion

Provide institutional level training to safely and effectively transform and train technically and tactically proficient warriors who are confident in their warfighting skills, embody the warrior ethos, and live the Army values.

Medical Education & Training Campus (METC)  
AMEDD Center and School (AMEDDC&S)

Soldier Medic!

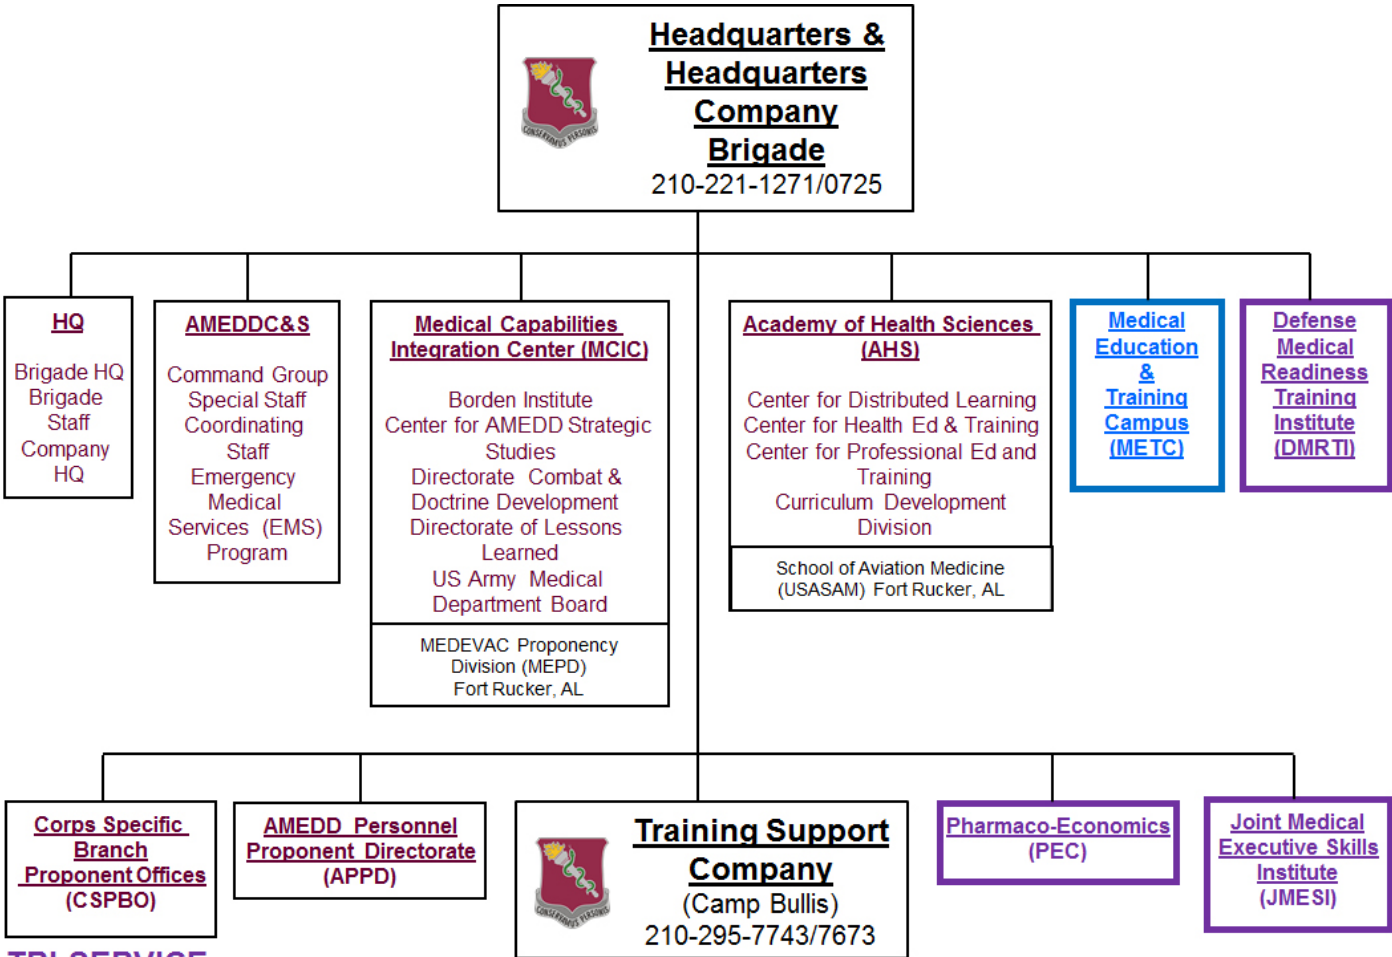

Answering the Call!

32d Medical Brigade

HHC Brigade

Provide Mission Command, training, administrative, and logistical support to all assigned or attached personnel.

TRI-SERVICE  
Medical Education & Training Campus (METC)  
AMEDD Center and School (AMEDDC&S)

Excellence in Action!

# Noncommissioned Officers Academy (NCOA)

The Noncommissioned Officers Academy trains and educates selected noncommissioned officers. This training incorporates tactical, technical, and leadership skills to develop and prepare leaders to support Army transformation through the execution of leadership fundamentals which reinforce warrior ethos and Army values. The Academy also fosters noncommissioned officer development as squad leaders, platoon sergeants, and first sergeants, preparing them to lead and train Soldiers.

## Advanced Leader Course

Platoon/Section Level Leadership and Technical Training

## Senior Leader Course

Platoon/Company Level Leadership with a focus on First Sergeant and Operations skill sets

## Mobile Training Teams

Provided at US Army Forces Command (FORSCOM) installations for Brigade Combat Teams (BCT) in Reset Phase of Army Force Generation (ARFORGEN)

## Distributed Learning

Prerequisite leadership training for all 68 Career Management Field (CMF) Active, Guard and Army Reserve Soldiers

# AMEDDC&S - Center

- IM/IT Integration & Collaboration
- AMEDD Statagic Studies & Analysis
- Theatre Healthcare System
- Combat Development Process

*We envision and design medical force structure, concepts, personnel requirements, and medical equipment to support the medical force*

# Medical Capabilities Integration Center (MCIC)

## The AMEDD's Concept and Capabilities Architect

The mission of the Medical Capabilities Integration Center (MCIC) is to develop, coordinate and integrate Force Management, Force Development, Force Integration, Force Sustainment, and Force Modernization processes within the AMEDD; US Army Training and Doctrine Command (TRADOC), Headquarters, Department of the Army (HQDA); and other services and agencies in building the medical arm of tomorrow's Army. MCIC leads the development and integration of capabilities and requirements determination; develops concepts, force designs, force

structure, and operational and system architectures involving the AMEDD operating force within the doctrine, organization, and materiel (medical and nonmedical) domains across the Army, using resource informed, integration focused, and outcome based processes. MCIC's primary function is adapting the AMEDD to meet the medical challenges the Army faces today, as well as the future. We accomplish this through four lines of effort:

### Develop

MCIC develops operational concepts, doctrine, organizational structures and material requirements which support current and emerging Army operational concepts and provides solutions for lessons learned that support the war fighter's needs.

### Evaluate

MCIC produces resource-informed assessments to determine how medical operational assets should be organized, equipped, and modernized. These assessments factor in the diverse considerations across the domains of doctrine, organization, training, material, leadership, personnel, and facilities (DOTML-PF).

### Integrate

MCIC integrates the AMEDD operational concepts, doctrine, organization, and material solution sets with TRADOC, FORSCOM, HQDA, Army Operating Force medical units, and Sister Service medical capability developers.

### Communicate

MCIC engages and communicates with a broad spectrum of Department of Defense and Department of the Army activities in order for them to understand and support the resourcing of the AMEDD's required capabilities.

These four lines of effort support the MCIC end state: *an agile and adaptive medical force that meets current and future requirements of the Joint Force*. In many ways, MCIC is the think tank for the AMEDD, looking at the future, determining the threats the Army will face and the missions it will receive, and developing the medical operational concepts required to support the Army's concept of operations. One of the key outputs of a concept is that it drives doctrine. The other key output is the required capabilities the medical force uses to develop organizational structures and material requirements.

The Medical Capabilities Integration Center is comprised of five major directorates responsible for a specific aspect of the AMEDD capabilities development. The five directorates are in constant collaboration with each other, as well as with various Department of Defense agencies and Joint coalition partners.

## Army Medical Department Board

Provides independent operational test and evaluation of medical and medical-related materiel and information technology products in support of the Army and Department of Defense acquisition process; provides assessments of emerging concepts, doctrine, and advanced technology applications applied to the delivery of healthcare, both on the battlefield and in fixed facilities. **210.221.1238**

Medical Capabilities Integration Center (MCIC)

Borden Institute

Fosters and promotes excellence in operational and military academic medicine. Enhances military clinical education through development, publication and maintenance of the Textbooks of Military Medicine. Responsible for producing Textbooks of Military Medicine, covering a spectrum of military medical scholarship. 210.221.1302/2477

Directorate of Combat and Doctrine Development (DCDD)

Responsible for developing concepts, organizations, materiel and doctrine for Force Health Protection (FHP) to the Army across the operational continuum. Identify operational and clinical capability and requirement solutions across the TRADOC DTLOM-PF domains. 210.221.0130

Center for AMEDD Strategic Studies (CASS)

Provides data-driven studies, analyses, and evaluations to the AMEDDC&S and Office of the Surgeon General (OTSG) in support of current and future Force Health Protection Operations. 210.221.0048

Medical Evacuation Proponent Directorate

Manages the Army medical evacuation system across the DOTML-PF spectrum and integrates this system into the Joint interdependent force. 334.255.1166

# AMEDD Personnel Proponent Directorate (APPD)

APPD serves as the AMEDD’s analytical activity performing manpower and P-Domain analyses supporting a range of AMEDD and Army customers. We analyze, synchronize, and integrate AMEDD force structure life cycle management within Army-wide DOTMLPF changes. **210.221.9936**

## Civilian Personnel Proponent Division (CPPD)

Analyzes and makes recommendations pertaining to the training, education, and development of civilian employees in medical-related occupations. The primary focus is supporting 32,000+ employees within 85 Civilian occupational series which are grouped under Career Program 53-Medical. CPPD implements Civilian Workforce Transformation (CWT) initiatives such as developing and maintaining Army Civilian Training, Education, Development System (ACTEDS) Plans, Career Maps and DoD competencies. **210.221-9962**

## Enlisted Personnel Proponent Division (EPPD)

The Enlisted Personnel Proponent Division (EPPD) provides Military Occupational Specialty (MOS) career field occupational analysis, evaluation, studies, and monitoring capabilities for TSG. EPPD ensures the AMEDD Enlisted force structure meets the needs of the Army by synchronizing and integrating policy changes while managing the sustainment of the eight personnel life-cycle functions. The division is responsible for making recommendations relating to personnel management of the AMEDD Enlisted Career Field 68. **210.221-9963**

## Force Structure Division

Serves as the one data source within the Directorate providing data, information, analysis, and guidance in support of the following areas: Objective Force Models (OFMs); analytical models and decision support tools for AMEDD in all components; monthly Force Management System

(FMS) Web/The Army Authorization Documentation System (TAADS) data extraction and analysis for approved requirement and authorization documents; Medical Occupational Data System (MODS) inventory and continuation rates; quarterly Critical Skills summaries; specified Area of Concentration (AOC)/MOS and Additional Skill Identifier (ASI) detail data by command; continual data analysis and creation of OFMs for the AMEDD officer corps; collaboration with Army National Guard and Army Reserve to develop an alternative method in determining continuation rates and constructing OFMs. **210.221.9908**

## Officer Personnel Proponent Division (OPPD)

Serves as the AMEDD’s personnel analytical activity for the six AMEDD Officer Corps comprised of ninety-eight AOCs, two AMEDD Warrant Officer AOCs and one AMEDD Immaterial AOC. OPPD also provides similar support for ~4,500 authorized Army National Guard medical officer and warrant officer positions (27 individual AOCs) and ~8,500 authorized USAR medical officer and warrant officer positions (77 individual AOCs). OPPD’s analysis and strategic AMEDD officer personnel management policy recommendations assist TSG, Chief of the Army Reserve, Director of the Army National Guard, the Commander of the AMEDDC&S, and the AMEDD Corps Chiefs in support of their roles for the AMEDD IAW AR 600-3 and AR 5-22. **210.221.9964**

- **Department of Dental Science (DDS)**
- **Department of Behavioral Health Sciences (DBHS)**
- **Department of Nursing Science (DNS)**
- **Department of Preventive Health Services (DPHS)**
- **Department of Veterinary Science (DVS)**
- **Department of Warrior Transition (DWT)**
- **Department of Medical Science (DMS)**
- **Department of Health Support Services (DHSS)**

## Deployable Medical Systems Equipment Training (DMSET)

The Field Training Exercise (FTX) & Field Operations Department/DMSET consists of two branches: 1) Medical Operations and 2) the Warrior Tasks and Battle Drills (WTBD).

The primary function of the DMSET is to enhance readiness of the Army Medical Department (AMEDD) by providing essential training in how to complex, deploy, setup, and operate medical sets and equipment in order to improve medical support capabilities and the promotion of a modernized, vigorous "Fighting Force."

The Medical Operations mission is to provide training and instruction to Advance Individual Training (AIT) 68 Medical Occupational Series (MOS) and Officers (Medical) Area of Concentration (AOC), Active Component, Reserve Component, and National Guard personnel in all areas of medical and nonmedical support equipment to include the Alaska Shelter Tent for the Combat Support Hospital (CSH), International Standards Organization (ISO) Shelters, 100 KW Generators, Water Distribution System, Power Distribution, and Family of Medium Tactical Vehicles - Load Handling Systems (FMTV-LHS) in operational set up, in order to enhance combat health care.

The WTBD mission is to provide the "Combat Medical War Fighters" (AMEDD Officers and 68 MOS personnel) an unparalleled training infrastructure offering a quality range training facility and maneuver area that facilitates tough, realistic training of 14 WTBD, which include Convoy Operations, Military Operations in Urban Terrain (MOUT), and Patrol Operations, thereby cultivating the necessary skills to survive in combat. **210.295.7735/7571**

Department of Dental Science (DDS)

The Department of Dental Science (DDS) mission is to manage the Army's dental health related training for AMEDD Officers, Enlisted Soldiers and International Military Officers within the tri-service curriculum by utilizing a staff of Officers, NCOs, and DA Civilians. DDS provides first class Warrior focused military training with an exceptional team of professionals dedicated to equipping the Dental Soldier with battlefield ready skills and real time knowledge. 210.221.8055

- Perioperative Nursing Course
- Obstetrics and Gynecology Nursing Course

Department of Behavioral Health Sciences (DBHS)

The Department of Behavioral Health Sciences mission is to establish and provide training on the most current, evidenced-based behavioral health treatment modalities designed for the military medical force and the U.S. Army. 210.221.8026

- Family Advocacy Staff Training
- Alcohol and Drug Rehabilitation Training
- Master Resiliency Training for Medical Providers
- Post-traumatic Stress and Resiliency Training (includes Cognitive Processing Therapy; Sleep Dynamic Therapy; Cognitive Behavioral Conjoint Therapy; Eye Movement, Desensitization & Reprocessing Therapy)
- Combat and Operational Stress Control
- Traumatic Event Management Facilitator Course
- Warrior Adventure Quest Facilitator Training
- Behavioral Health Special Topics (includes topics on Anxiety Disorders, Psychotic Personality, Eating Disorders, Child & Adolescent Disorders and Substance Use Disorders)

Department of Preventive Health Services (DPHS)

The Department of Preventive Health Services provides training in Preventive Medicine, Public Health, and Medical Chemical, Biological, Radiological, and Nuclear Defense to Army, U.S. military, civilians, and international military partners worldwide. 210.221.8909

- Public Health
- Environmental Health
- Medical Zoology
- Chemical, Biological, Radiological, and Nuclear
- Health Physics Specialist
- Preventive Medicine
- Civil Affairs Medical Specialist
- Occupational Health and Industrial Hygiene
- DOD Pest Management Certification and Recertification

Department of Veterinary Science (DVS)

The Department of Veterinary Science prepares individuals and units to deploy and perform their veterinary service support of worldwide operations for the Department of Defense. It develops and teaches course material for officers, enlisted personnel, and civilians who are involved in veterinary health care and food protection, to include food safety/defense and veterinary preventive medicine. **210.221.4933**

- Animal Health
- Force Protection
- Animal Care Specialist
- Veterinary Food Inspection Specialist

Department of Warrior Transition (DWT)

The Department of Warrior Transition serves as the proponent, advisor, and subject matter expert for Warrior Transition Unit (WTU) staff and cadre training throughout the Army.

We provide standardized training for personnel newly assigned to a WTU or Community Based WTU. These Commissioned Officers, Noncommissioned Officers, and Civilians are from all Army MOSs and AOCs. Resident training courses serve as part of the required certification training.

The Army Nurse Case Manager (NCM) Course was previously designed solely for WTU case management. With improvements and expansion, it is the Army standard for all nurse case management. **210.221.8080**

- WTU Squad Leader and Platoon Course (ASI Y9)
- WTU Company Leadership Course
- Army Nurse Case Manager Course (ASI M9)
- Senior/Clinical Leader Orientation Program
- Warrior Transition Unit Distributed Learning Course

Department of Health Support Services

The Department of Health Support Services (DHSS) provides the development and instruction for a variety of enlisted and officer programs. These include functional and sustainment courses for enlisted personnel, as well as technical tracks following the Advanced Leaders Course (ALC). In addition, the DHSS capitalizes on the specialized clinical training received by its biochemists, clinical laboratory officers, microbiologists, nutritionists, and pharmacists; as well as the specialized administrative training received by its health administrators, information management specialists, patient administrators, human resource managers, and logisticians to support a number of officer training programs; providing general instructional support for the training of physician assistants, physical therapists, nutritionists, and health care administrators, as well as specific Areas of Concentration (AOC) producing and technical track training. **210.221.8124**

- Anatomy and Physiology Branch (Officer and Enlisted)
- Human Resources Branch (Officer)
- Information Management Training Branch (Officer)
- Joint Biological Agent Identification and Detection System (JBAIDS) (Officer and Enlisted)
- Laboratory Branch (Officer/Enlisted)
- Logistics Management Branch (Officer/Warrant/Enlisted)
- Nutrition Diet Therapy Branch (Officer and Enlisted)
- Occupational Therapy Branch (Enlisted)
- Optical Laboratory Branch (Enlisted)
- Patient Administration Branch (Officer/Enlisted)
- Pharmacy Branch (Officer/Enlisted)
- Radiology Branch (Enlisted)

**Center for Prehospital Medicine (CPHM)**

The Center for Prehospital Medicine (CPHM) functions as a learning center for physicians, physician assistants, nurses, critical care flight paramedics, and combat medics and proponent for prehospital medicine. The Center provides education and training in tactical combat casualty care, advanced tactical emergency skills, pre-deployment trauma, and all facets of tactical medical leader development. **210.221.9646/9518**

**Army Trauma Training Branch**

The Army Trauma Training Branch (ATTB) provides a comprehensive training venue to enhance resuscitative, perioperative, surgical, and critical care treatment of Soldiers within the construct of critical team concepts. These skills are trained with emphasis on trauma patient care within the operational context of the deployed Forward Surgical Team or similar element. **305.585.1232**

**Advanced Training Branch**

The Advanced Training Branch provides training and development for the basic noncommissioned officer as a leader who can supervise and train subordinates. Emphasis is placed on Health Care Service Support at the medical Noncommissioned Officer-in-Charge (NCOIC) (medical squad, platoon, or section leader) level. The branch also develops and conducts introductory training for initial entry level Army Medical Department Soldiers in orthopedics; physical therapy; occupational therapy; cardiovascular; ear, nose and throat; and eye specialties. **210.221.6931**

**Department of Combat Medic Education**

The Department of Combat Medic Education provides analysis, revision, and evaluation of all US Army enlisted prehospital medical curricula to ensure the quality of training and standardization throughout the active and reserve components. The department also provides video teletraining (VTT) worldwide, allowing Soldiers to maintain Emergency Medical Technician (EMT) certification. **210.221.3015**

**Department of Tactical Medicine**

The Department of Tactical Medicine designs, educates, and trains specified Role I and II physicians, physician assistants, nurses, critical care flight paramedics, and combat medics in tactical combat casualty care (TCCC) and advanced tactical emergency care skills. The department also provides training in all facets of tactical medical leader development and serves as proponent, advisor, and subject matter expert on predeployment tactical medical training. **210.221.9599**

**Critical Care Flight Paramedic Program**

The Critical Care Flight Paramedic (CCFP) Program is responsible for the design, conduct, and supervision of paramedic level training and additional critical care skills. The organization provides emergency medical service direction and expertise to the AMEDDC&S, the US Army School of Aviation Medicine (USASAM), the Medical Evacuation Proponency Directorate, and the US Army Forces Command. The program also works with combatant commands to develop clinical operations that provide advanced paramedic skills in combat and other contingency environments. **210.221.0993**

**Center for Professional Education and Training (CPET)**

The Center for Professional Education and Training's primary mission is to sustain professional education and training for AMEDD Soldiers throughout their military life cycle by accurately forecasting and facilitating continuing education and self-development training opportunities on a worldwide basis in the areas of Long Term Health and Education and Training (LTHET) and Professional Post-graduate Short Course Programs (PPSCP). **210.295.9528**

**Department of Pastoral Ministry Training (DPMT)**

The Department of Pastoral Ministry Training provides Chaplain and Chaplain Assistant training in clinical and trauma settings to deliver world-class pastoral care across the spectrum of military medical operations. **210.221.8609**

- Emergency Medical Ministry Training
- Combat Medical Ministry Training
- Medical Ministry Substance Abuse Training
- Medical Ministry Spiritual Health Training
- Medical Ministry Spiritual Resiliency Training (SRRT)
- Medical Ministry Supervision Training
- Warrior Transition Unit, Unit Ministry Team Training
- Clinical Pastoral Education
- Doctor of Ministry Program

**Distributed Learning Division (DLD)**

The Distributed Learning Division provides guidance and support regarding distributed learning (DL) development, delivery, facilities, and technological resources, including a Help Desk, and is the MEDCOM executive agent for all new and existing DL. In-house development capabilities include: interactive multimedia development, video production, video capture, and more. **210.221.6888**

Visit <https://www.us.army.mil/suite/page/260886>.

**International Military Student Office (IMSO)**

In 2000, Congressional and State Department authorization expanded the Defense Department Joint Security Assistance Education and Training Program to increase training opportunities within the international military community.

Some of the major objectives of this program have the express purpose of promoting standardization and interoperability in order to enhance coalition operations in support of our Nation while building partner capacity.

Today, the AMEDD Center & School has a pivotal role in this mission, an integral part of our national security. In addition, through the congressional-directed DOD Field Studies Program, international military students are also provided a balanced understanding of the U.S. society, institutions, and democratic ideals.

**210.221.8579**

**Leader Training Center (LTC)**

The Leader Training Center is responsible for courses that cover the spectrum of medical officer leadership skills. It provides professional military education and training to enhance the leadership competencies of the Army Medical Department's Officer Corps. **210.221.8213**

- Basic Officer Leaders Course
- Captains Career Course
- Medical Strategic Leadership Program
- AMEDD Executive Skills Program
- Brigade and Division Surgeon's Courses
- Forward Surgical Team Commander's Course
- Health Services, Plans, Operations, Intelligence, Security & Training Officer Course
- AMEDD Pre-Command Course

US Army School of Aviation Medicine (USASAM)

The US Army School of Aviation Medicine (USASAM) conducts aeromedical training of medical and aviation personnel to maintain and improve the operational readiness of the US Army, Joint and Allied forces. USASAM trains all of the Army's aeromedical occupational specialties and teaches aeromedical classes for all Army aviators and crew members. USASAM operates the only hypobaric altitude chamber in the Army, training approximately 800 pilots, crew members and Special Operations parachutists annually.

- Aeromedical Psychology Training
- Joint Enroute Care
- Medical Evacuation Doctrine
- Aviation Medicine Clinic NCO
- Army Aviation Medicine Orientation
- Hypobaric Chamber Training
- Aeromedical Evacuation Officer Pre-Command

Graduate School (GS)

Main Campus Programs

Doctoral Degrees

- Doctoral Program in Physical Therapy (DPT), Baylor University
- Pastoral Care, Erskine Seminary
- Anesthesia Nursing, Northeastern University

Master's Degrees

- Health and Business Administration, Baylor University
- Health Administration, Baylor University
- Nutrition, Baylor University
- Interservice Physician Assistant Program, University of Nebraska
- Social Work, Fayetteville State University

Hospital Based Programs

Doctoral Degrees

- Doctorate (DSc) in Physical Therapy - Sports Medicine, Baylor University
- DSc in Orthopedic & Manual Physical Therapy, Baylor University
- DSc in Physician Assistant Emergency Medicine, Baylor University
- DSc in Physician Assistant Clinical Orthopedics, Baylor University
- DSc in Physician Assistant General Surgery
- DSc in Occupational Therapy, Baylor University

# Supporting Organizations

## Defense Medical Readiness Training Institute (DMRTI)

The Defense Medical Readiness Training Institute (DMRTI) enhances medical operational and sustainment capabilities through Joint, Interagency, Intergovernmental, and Multinational training. DMRTI is a unique tri-service military organization staffed by U.S. Soldiers, U.S. Sailors, U.S. Airmen, and civilians.

DMRTI offers both resident and non-resident joint medical readiness training courses as well as professional medical programs. 210.221.2175

Visit: [www.dmrtdi.army.mil](http://www.dmrtdi.army.mil) for a complete listing of courses and available dates

- **Combat Casualty Care Course (C4)**
- **Advanced Trauma Life Support (ATLS) Course**
- **Pre-hospital Trauma Life Support (PHTLS) Course**
- **Trauma Nursing Core Course (TNCC)**
- **Emergency War Surgery Course (EWSC)**
- **Joint Operations Medical Managers Course (JOMMC)**
- **Medical Stability Operations Course (MSOC)**
- **Public Health Emergency Management (PHEM) Course**
- **Federal Coordination Course (FCC)/PRC Basic Operations Course**

## Joint Medical Executive Skills Institute (JMESI)

The Joint Medical Executive Skills Institute (JMESI) is a Center of Excellence in Leader Development and Lifelong Learning as well as the proponent for military medical executive education. In response to the Congressional mandate resulting from the Defense Appropriations Act of 1992, the JMESI provides opportunities for competency achievement to MHS personnel along with appropriate interagency organizations.

The JMESI leads the Military Healthcare System (MHS) in preparing its current and future leaders by ensuring effective and efficient delivery vehicles for the competency areas listed in the Joint Medical Executive Skills Program Core Curriculum. The curriculum document provides the learning objectives and the behavior statements to be used when designing and developing curriculum for leadership and management skills throughout the MHS.

Two of the three venues of learning provided by the JMESI are the Capstone Symposium (Course) and the Healthcare Management Seminar (Course). These products provide opportunities for competency achievement through face to face settings. When coupled with the robust StratEgic Communication Distance Learning Program, the venue of choice for all users, the result is a comprehensive delivery system for medical executive education. The JMESI products and services benefit users from within the MHS, as well as, the VA, the USPHS, the CDC, and select International students. 210.221.0463

## Emergency Medical Services (EMS) Program

The Emergency Medical Services Program supports all Army sponsored Emergency Medical Services (EMS) training sites worldwide. It is recognized by the National Registry of Emergency Medical Technicians as the EMS office for the United States Army. It acts as liaison to the National Registry of Emergency Medical Technicians, NREMT, for all EMT related courses, coordinates registration and reregistration issues, and serves as the liaison for the International Trauma Life Support courses. 210.221.0837

## Army Research Laboratory – Army Medical Department Field Element (ARL AMEDD FE))

The ARL AMEDD FE's mission is to conduct human factors and human performance research and consultation in support of the largest medical education and training campus in the world at Fort Sam Houston, Texas. Our Research results assist students attending health care AIT, active duty and veterans, and those without and with clinical diagnoses (traumatic brain injury (TBI), post-traumatic stress disorder, anxiety. Current research includes the investigation of a software tool to assist in reducing student attrition and improving learning; use of emerging technologies to identify individuals with a TBI, investigating alternative education delivery mechanisms via a Virtual World, effectiveness of Mindfulness-Based Stress Reduction (meditation) in improving resiliency and neurocognitive performance, and the efficacy of neurocognitive temporal training in improving weapon-firing accuracy, deployment speed, and friend/foe discrimination. 210.221.2007/2635

***The Army Medical Department Center  
and School is the largest military medical  
training facility in the world***

**Largest training brigade in the Army**

**Average daily student load over 5500**

**Faculty and staff over 2500**

**Distributed learning and sustainment training programs**

**Training sites at Army, Navy, Air Force and VA medical facilities**

**Training Army, Army Reserve, Army National Guard, Navy,  
Air Force, and international military students**

***We save lives – on and off the battlefield***
